

Consider hospital indemnity insurance—even if you have a good medical plan

Many people are not financially prepared for an unexpected hospital stay; the average three-day hospital stay is around \$30,000¹. Hospital indemnity insurance can help provide a financial cushion so you can stay on track financially and focus on your recovery.

➔ Answers to frequently asked questions

I have a good medical plan, so why do I need hospital indemnity insurance?

A hospital indemnity plan works to complement your medical coverage—paying in addition to what your health plan may or may not cover.

It pays a lump-sum amount directly to you to use however you choose, like for out-of-pocket² medical costs such as deductibles, co-pays, or non-covered services. You can even use it to help pay for everyday living expenses—like babysitters and take-out food—making recovery a little easier and helping you to safeguard your savings.
